This is the targeted study guide for EXAM 2, which will cover Chapters 8 thru 15 of the required textbook. Learners are strongly advised to read and study each chapter thoroughly prior to completing this study guide. Moreover, Learners are advised to complete this study guide early and not wait until the last minute to do so.

The exam will be administered on Online Campus, so be prepared for this. There will be 90 multiple-choice items on this test, each of them worth 2.5 possible points. The entire exam is worth a possible 225 points. Additionally, this exam will be timed—Learners will have exactly 90 minutes (1 minute per item) to complete this exam.

This study guide will cover each test item in very specific detail, providing Learners with enough information, in theory, to all test items correctly on the actual test.

DISCLAIMER: This study guide DOES NOT guarantee a passing grade on the exam, nor shall the Learner interpret this study guide as a guarantee of a passing grade on the exam.

If Learners have any questions concerning the information presented within this study guide, they can contact me via my personal cell phone, e-mail, or face-to-face office hours. I will attempt to guide the Learner toward complete understanding. However, I will not provide Learners with direct answers and my assistance will be very limited.

Each item on this study guide will be represented on the actual exam. On the exam, however, all items will be scrambled up!

NOTE: I have provided you all with the author’s reference page number(s) for each item. This should hopefully make it easier for you, but the reference page numbers will not “give you the answer”. All items below are conceptual in nature and require you to use critical thinking and even imagination. DISCLAIMER: Page numbers may be incorrect!

Page: 233
1. Girls menstruated at an average age of 16 in the nineteenth century, but today some girls reach menarche as early as age 9. This phenomenon is called the ______ trend.

Page: 238
2. Statistically speaking, identify the sort of child likely to reach puberty at the youngest age?
3. After reading the text, Joanne is comparing first menstruation reactions today in the West versus a few decades ago. Identify the kind of statements Joanne *CAN* make?

Page: 241

4. Compared to menarche, spermache:

Page: 241-242
